These practical publications have been produced by the WUWHS 2016 Secretariat and Wounds International with input from the world’s leading experts in their respective fields. They aim to guide your practice via thorough review of the latest scientific research and innovative technologies.

These practical documents fall into three main categories as follows:

**WUWHS 2016: Consensus Documents**
- The role of dressings in pressure ulcer prevention – supported by Molnlycke Healthcare
- Closed surgical incision management: Understanding the role of NPWT – supported by Smith & Nephew

**WUWHS 2016: Position Documents**
- Management of Biofilm – supported by B Braun
- Local management of diabetic foot ulcers – supported by Acelity
- Understanding Hidradenitis suppurativa
- Advances in wound care: The Triangle of wound assessment – supported by Coloplast

**WUWHS 2016: Clinical Reports**
- Innovations in hard-to-heal wounds – supported by ConvaTec

Pdf copies can be downloaded from www.wuwhs2016.com and www.woundsinternational.com/wuwhs
Embracing Guidelines, Processes and Patient Partnership

The Wounds UK Annual Conference will return to Harrogate on 14-16 November 2016 for another year of outstanding clinical and practical content designed to provide all UK wound care clinicians an unparalleled update in the latest wound care developments.

This year’s programme includes speakers from around the UK, providing the latest practical and clinical evidence, supported by a number of key international speakers who will offer their global perspective. As in 2015, we will also be providing you with a choice of our popular interactive Made Easy sessions to take part in, designed to keep you up to date with the latest evidence and practice, as well as the appropriate use of various products.

In addition, we are pleased to announce that the Foot in Diabetes UK Conference will again run alongside Wounds UK with a separate programme (Tuesday only), further increasing the range of content available to delegates, see page 8 for the full programme.

To enhance your experience, the Wounds UK Annual Conference offers an extensive poster exhibition showcasing practitioners’ work from around the world, complimentary CPD workbooks and certificates for every attendee, the Wounds UK Award for Excellence to acknowledge outstanding work within the wound care community, a glittering black tie Gala Dinner and the largest exhibition of wound care companies and manufacturers anywhere in the UK.

Welcome to what promises to be our best event to date.

Rob Yates
Managing Director, Wounds UK
## MONDAY 14TH NOVEMBER

### 09.45-10.15
Registration, refreshments and e-poster viewing

### 10.15-10.45
**Conference welcome — making the case for change: guidelines, processes and patient partnership**

*Jacqui Fletcher, Independent Nurse Consultant*

**Changes in delivery of care**
- Reflecting on the year — sustainability and transformation
- Competency of care
- Funding, future and validation

*Karen Gusey, Professor of Skin Integrity, Director for the Institute of Skin Integrity and Infection Prevention, Clinical Associate Professor, Australian Catholic University Adjunct Associate Professor, School of Nursing, Faculty of Health at the Queensland University of Technology*

### 10.45-11.30
**Mapping the political landscape in nursing — for TVNs**

*Carter report — implications in practice
- Stop the pressure — revitalised
- Health economics of pressure ulcer prevention

*Mark Radford, Clinical Director of Improvement, NHS Improvement*

**Clinical evaluation team — the national programme**
- Defining the scope of the programme
- Update on the progress
- The future of the programme

*Naomi Chapman, Clinical Programme Lead, Deputy Chief Nurse, Clinical Evaluation Team, Department of Health*

### 11.30-11.45
Comfort break

### 11.45-12.30
**Made Easy Interactive Workshop 1 (Held in the Queen’s Suite)**

1. **Venous leg ulcers — cleaning, healing and preventing recurrence** Developed by Wounds UK, in association with medi UK
   - Wound bed preparation for leg ulcers — cleaning to assess and manage the wound bed
   - Healing and prevention — understanding skin care and patient needs
   - Practical skills — applying optimum compression

*Kim Socrates, Tissue Viability Nurse Specialist, Leeds NHS Foundation Trust, London*

*Leanne Atkin, Lecturer Practitioner, The University of Huddersfield*

2. **Heel ulcer prevention — how to simply do what we should be doing** Developed by Wounds UK, in association with Talarmed
   - CPR for feet — a safe and effective approach
   - Prevent the event — choosing appropriate pressure relief strategies
   - Demonstrating cost savings

*Duncan Stang, Diabetes Foot Coordinator for Scotland and Scottish PDUK Representative, Lanarkshire*

3. **Static, chronic wounds — a new approach to wound bed preparation** Developed by Wounds UK, in association with Activa Healthcare
   - Revealing the results of a 2000-patient survey
   - Impact of a biofilm-based wound care pathway to kick start healing
   - Putting clinical innovation into practice

*Richard Sharney, Manager, Real Healthcare Solutions*

*Leanne Atkin, Lecturer Practitioner, The University of Huddersfield*

4. **Use of NPWT in the treatment of diabetic foot ulceration** Developed by Wounds UK, in association with Smith & Nephew
   - New NICE guidance supports use of NPWT in the treatment of diabetic foot ulceration
   - Selecting the most appropriate NPWT device within diabetic foot treatment pathway
   - Gain hands-on experience using portable NPWT — tips and tricks for optimising benefits

*Graham Bowen, Clinical Lead for Podiatry, Solent NHS Trust*

5. **Medical adhesive-related skin injury (MARSI) — promoting skin safety** Developed by Wounds UK, in association with 3M Healthcare
   - Recognising MARSI — global best practice
   - Evidence-based strategies for prevention in the high-risk patient
   - Preventing avoidable harm across the NHS — UK initiatives for implementing change

*Laurie McNichol, Clinical Nurse Specialist/WOC Nurse, Cone Health Wesley Long Hospital, North Carolina, USA*

*Kim Socrates, Tissue Viability Nurse Specialist, Oxleas NHS Foundation Trust, London*

*Leanne Atkin, Lecturer Practitioner, The University of Huddersfield*

### 12.30-13.00
Lunch and e-poster viewing

### 13.00-13.30
**The burden of wounds on the NHS — update on the results of the national study**
- Predicting the increase in the number of wounds managed in the NHS in the next decade
- How to change care delivery to improve wound healing outcomes
- What is the role of clinical commissioners in meeting wound care needs?

*Peter Vowden, Honorary Visiting Professor of Wound Healing Research, Centre of Skin Sciences, University of Bradford*

*Julian Guest, Director, Catalyst Economics Consultants, Northwood, Visiting Professor of Health Economics, King’s College, London*

*Kathryn Vowden, Lecturer, Bradford Royal Infirmary*

**Time to face the challenge of wound infection** Supported by Schülke
- Biofilms and infection — removing the barriers to healing
- When and how to use a topical antimicrobial
- Self-harm injuries — the role of wound cleansing

*Kathryn Vowden, Lecturer, Bradford Royal Infirmary*

*Michael Braun, Manager Medical Affairs, Schülke & Mayr GmbH*

*Sharen Hunt, Lead Advanced Nurse Practitioner, Wellmay Medical*

### 13.30-14.15
**Challenging wounds**
- Mucosal wounds — tongue, gastrointestinal (GI) tract, nasal passages, urinary tract and vaginal canal
- Pemphigoid and other blistering diseases

*Keith Harding, Dean of Clinical Innovation, Head of Wound Healing Research Unit (WHRU), Cardiff University*

*Joyce Black, Associate Professor, University of Nebraska Medical Centre, USA*

*Janice Bianchi, Honorary Lecturer, Nursing and Healthcare, University of Glasgow*
Early detection technology transforms care and releases productivity — an NHS case study from procurement to practice Supported by Bruin Biometrics

- Integrating early detection technology into PU prevention practice in the NHS
- The impact of the SEM Scanner on patient outcomes and nursing productivity
- Why a new approach is needed
- Reducing HAPUs isn’t enough — assessing the non-clinical outcomes of introducing new technology

Chair: Jacqui Fletcher, Independent Nurse Consultant

Zena Moore, Professor and Head of the School of Nursing and Midwifery, RCSI School of Nursing, Dublin, Ireland

Glen Smith, Clinical Nurse Specialist for Nutrition and Tissue Viability, Isle of Wight NHS Trust

Made Easy Interactive Workshop

16.00-16.45

Free paper presentations

08.00-08.45

Held in the Queen’s Suite

1. Effective management of chronic oedema: Achieving improved clinical outcomes, reducing costs and improving quality of life

Dawn Winstone, Kent Community Health NHS Foundation Trust, Tonbridge

2. Effective removal of occupational traumatic skin tattoo with a monofilament fibre debridement pad

Claas Roes and Lars Hofmann, University Hospital, Erlangen, Germany

3. Using ActivHeal Silicone Wound Contact Layer dressing range to reduce painful dressing changes and promote healing of an acute surgical wound

Lindsay MacCallum, Clinical Support Nurse, Advanced Medical Solutions, Winsted

4. A step change in pressure ulcer prevention: real world evidence from a large-scale, multi-site evaluation of a hybrid mattress

Jacqui Fletcher, Independent Nurse Consultant

Pressure injury vs pressure ulcers

08.45-09.15

Wound cleansing: taken seriously Supported by B Braun

Held in Hall D

- Why a new approach is needed
- How the introduction of a new pathway reduced HCAIs in a large acute trust
- Building evidence and effectiveness data for wound cleansing to prevent complications
- Mark Collier, Nurse Consultant, Tissue Viability, United Lincolnshire NHS Hospital Trust
- Pamala Hefer, Medical Scientific Affairs Manager, B Braun Medical Ltd

Is your clinical practice safe? Addressing patient safety and clinical integrity when using wound contact layers with NPWT? Supported by Mölnlycke Healthcare

Held in Hall D

- New consensus document on the appropriate use of WCL’s with NPWT
- Clinicians’ recommendations
- Practical solutions

Chair: Jacqui Fletcher, Independent Nurse Consultant

Gemma Davies, Tissue Viability Lead Nurse, Shrewsbury and Telford Hospital NHS Trust

Joanne McCardle, Diabetes Foot Clinical Research Fellow, Edinburgh

North American experience — from gunshot to bariatric surgery (bypass to bullets)

08.45-09.15

Wound management in the diabetic foot ulcer Supported by Actica

- The impact of DFUs in the health care environment
- Management of infection in the diabetic foot
- Advanced wound therapies in the treatment of DFU

Chair: Paul Chadwick, Consultant Podiatrist, Salford Royal Hospital NHS Foundation Trust

Keith Harding, Dean of Clinical Innovation, Head of Wound Healing Research Unit (WHRU), Cardiff University

Nia Jones, Research Podiatrist, Welsh Wound Innovation Centre

Launch of UK Best Practice Statement for Holistic Management of Venous Leg Ulceration: recommendations and practice implications Supported by Activa Healthcare

- Challenging definitions and myths through consensus and evidence
- Self-care solutions — maximising the role of the patient in VLU management
- Applying recommendations to real-world practice

Chair: Jacqui Fletcher, Independent Nurse Consultant

Allison Hopkins, Chief Executive, Accelerate CIC

Caroline Browett, Nurse Consultant, East London NHS Foundation Trust

Leanne Atkin, Lecturer Practitioner, The University of Huddersfield

Chair: Jacqui Fletcher, Independent Nurse Consultant

Gemma Davies, Tissue Viability Lead Nurse, Shrewsbury and Telford Hospital NHS Trust

Joanne McCardle, Diabetes Foot Clinical Research Fellow, Edinburgh

North American experience — from gunshot to bariatric surgery (bypass to bullets)

- Emergency and later management of gunshot wounds
- Wounds in bariatric patients
- Long-term management of both patient groups

Chair: Karen Ossey, Professor of Skin Integrity, Director for the Institute of Skin Integrity and Infection Prevention, Clinical Associate Professor, Australian Catholic University Adjunct Associate Professor, School of Nursing, Faculty of Health at the Queensland University of Technology

Joyce Black, Associate Professor, University of Nebraska Medical Centre, USA

Reducing the cost of chronic wounds and improving outcomes for patients Supported by Synapse Electroceutical

Held in Hall D

- The impact of chronic wounds on the NHS
- The use of Electroceutical treatment in clinical practice — a case series
- Making the Case for Accel-Heal

Liz Ovens, Tissue Viability Specialist and Associate Lecturer, Bucks University

Wound management in the diabetic foot ulcer Supported by Actica

- The impact of DFUs in the health care environment
- Management of infection in the diabetic foot
- Advanced wound therapies in the treatment of DFU

Chair: Paul Chadwick, Consultant Podiatrist, Salford Royal Hospital NHS Foundation Trust

Keith Harding, Dean of Clinical Innovation, Head of Wound Healing Research Unit (WHRU), Cardiff University

Nia Jones, Research Podiatrist, Welsh Wound Innovation Centre

Launch of UK Best Practice Statement for Holistic Management of Venous Leg Ulceration: recommendations and practice implications Supported by Activa Healthcare

- Challenging definitions and myths through consensus and evidence
- Self-care solutions — maximising the role of the patient in VLU management
- Applying recommendations to real-world practice

Chair: Jacqui Fletcher, Independent Nurse Consultant

Allison Hopkins, Chief Executive, Accelerate CIC

Caroline Browett, Nurse Consultant, East London NHS Foundation Trust

Leanne Atkin, Lecturer Practitioner, The University of Huddersfield

</tbody>
</table>
15.00-15.30 The burden of wounds to the NHS — detailed analysis of treatment for diabetic feet
- Distribution of treatments
- Time on treatment and switching patterns
- Long-term outcomes
Chair: Julian Guest, Director, Catalyst Economics Consultants, Northwood, Visiting Professor of Health Economics, King’s College, London
Duncan Stang, Diabetes Foot Coordinator for Scotland and Scottish FDUK Representative, Lanarkshire

Surgical site session
Held in Hall D
- Overview of new Wound Health guidance
- Surgical wounds healing by secondary?
- Importance of early identification in practice
Chair: Keith Cutting, Clinical Research Consultant, Hertfordshire
Ian Chetter, Professor of Surgery, Hull York Medical School

15.30-16.15 Static air support surfaces to prevent pressure injuries Supported by Frontier Medical
- Preventing pressure injuries with repose — a multicentre cohort study in Belgian nursing homes
- The orthopaedic journey
Chair: Keith Harding, Dean of Clinical Innovation, Head of Wound Healing Research Unit (WHRU), Cardiff University
Dimitri Beeckman, Department of Public Health, University Centre for Nursing and Midwifery, Ghent University, Belgium
Lorraine Thursby, Service Lead Manual Handling and Tissue Viability, George Eliot Hospital NHS Trust
Tracey Emms, Ward Manager, Nason Ward, George Eliot Hospital NHS Trust
Chris Hall, SDMA Representative
Fiona Downie, Nurse Consultant Tissue Viability, Papworth Hospital NHS Foundation Trust
Diane Hargrove, BHTA Representative
Anita Kilroy-Findley, Clinical Lead Tissue Viability Nurse, Leicestershire Partnership NHS Trust

16.15-16.45 Exhibition, refreshments and e-poster viewing

16.45-17.15 From wound to scar: support for patients with scarring The Katie Piper Foundation
- What is scarring and what can we do about it?
- Recognising the problems scarring can cause and understanding available treatments
Chair: Keith Harding, Dean of Clinical Innovation, Head of Wound Healing Research Unit (WHRU), Cardiff University
RuthAnn Fanshone, Clinical Scar Advisor, Katie Piper Foundation

19.00-19.45 Pre-gala dinner champagne reception and Wounds UK award Supported by Crawford Healthcare

19.45-23.00 Wounds UK dinner

WEDNESDAY 16TH NOVEMBER

08.30-09.00 Registration, refreshments, e-poster and exhibition viewing

09.00-09.45 Challenging wounds
- Calciphylaxis
- Head wounds — critical care and trauma
- Managing pruritus
Chair: Janice Bianchi, Honorary Lecturer, Nursing and Healthcare, University of Glasgow
Jo Swan, Lead Tissue Viability Nurse, Queen Elizabeth Hospital, Birmingham
Fiona Downie, Nurse Consultant Tissue Viability, Papworth Hospital NHS Foundation Trust
Jacqui Fletcher, Independent Nurse Consultant

09.45-10.30 Bioengineering strategies to maintain tissue health
- Aetiology of mechanical-induced skin damage
- Bioengineering tools to assess skin health
- Design features to minimise medical device-related skin damage
Chair: Keith Harding, Dean of Clinical Innovation, Head of Wound Healing Research Unit (WHRU), Cardiff University
Dan Baxter, Professor of Bioengineering and Tissue Health, Faculty of Health Sciences, University of Southampton
Sarah Mewton, ABHI Representative

10.30-11.15 Harnessing the power of oxygen Supported by Inotec AMD
- Why is oxygen essential for wounds to heal and what happens when wounds are hypoxic?
- How can we increase oxygenation of wounds to improve their healing?
- How do we know oxygen helps? A review of recent and current trials
Chair: David Russell, Consultant Vascular Surgeon and Honorary Clinical Associate Professor, Leeds General Infirmary
Keith Harding, Dean of Clinical Innovation, Head of Wound Healing Research Unit (WHRU), Cardiff University

11.15-12.00 Exhibition, refreshments and e-poster viewing

12.00-12.45 Self-inflicted wounds and mental health
- Psychosis-driven self-harm — how this differs from other types of self-harm
- Understanding the psychology of self-harm in prison
Chair: Karen Ousey, Professor of Skin Integrity, Director for the Institute of Skin Integrity and Infection Prevention, Clinical Associate Professor, Australian Catholic University Adjunct Associate Professor, School of Nursing, Faculty of Health at the Queensland University of Technology
Anita Kilroy-Findley, Clinical Lead Tissue Viability Nurse, Leicestershire Partnership NHS Trust
Rachel Bussey, Tissue Viability Nurse Specialist, Offender Health, Nottingham Healthcare

12.45-13.30 The great debate: should commercial staff have open access to TVNs
Chair: Keith Harding, Dean of Clinical Innovation, Head of Wound Healing Research Unit (WHRU), Cardiff University
For: Jacqui Fletcher, Independent Nurse Consultant
Against: Karen Ousey, Professor of Skin Integrity, Director for the Institute of Skin Integrity and Infection Prevention, Clinical Associate Professor, Australian Catholic University Adjunct Associate Professor, School of Nursing, Faculty of Health at the Queensland University of Technology
Includes panel discussion from representatives from BHTA, SDMA and ABHI
Sarah Mewton, ABHI Representative
Diane Hargrave, BHTA Representative
Chris Hall, SDMA Representative

13.30 Conference close
08.00-08.50 REGISTRATION, REFRESHMENTS AND EXHIBITION VIEWING

08.50-09.00 CHAIR’S WELCOME
Paul Chadwick, Consultant Podiatrist, Salford Royal Hospital NHS Foundation Trust

09.00-09.30 THE EXPLODING BOMB — CURRENT STATE OF DIABETIC FOOT DISEASE
Update on the National Diabetes Foot Audit
What is the data telling us
What happens next
William Jefferies, Consultant, Nottingham University Trust

09.30-10.30 WHAT HAPPENS WHEN THE BOMB HAS EXPLODED — LIMB SALVAGE
Review of the consensus document
Best lower limb vascular assessment based on the consensus document
Suggest clinical severity handover thresholds & red flags for primary care managed non severe PAD vs surgical care managed severe or critical limb ischaemia
Robert Hinchliffe, Clinical Professor of Vascular Surgery, School of Social and Community Medicine, University of Bristol
New techniques including non-salvage
Calcanectomy, angiosomes, orphan heel syndrome
David Russell, Consultant Vascular Surgeon and Honorary Clinical Associate Professor, Leeds General Infirmary

10.30-11.15 URGO AWARDS — SUPPORTED BY URGO MEDICAL
Chair: Michelle Deeth, Head of Clinical Services, Urgo Medical
Award presented by Mike Edmonds, Consultant Diabetologist, King’s College Hospital, London
2015 winners
1. David Russell, Consultant Vascular Surgeon and Honorary Clinical Associate Professor, Leeds General Infirmary
2. Rose Cooper, Professor of Microbiology, Cardiff Metropolitan University
3. Rowena Jenkins, Lecturer in Microbiology, Cardiff Metropolitan University
Urgo start the evidence is growing
Paul Chadwick, Consultant Podiatrist, Salford Royal Hospital NHS Foundation Trust

11.15-12.15 REFRESHMENTS, EXHIBITION AND E-POSTER VIEWING

12.15-12.45 WHAT HAPPENS WHEN THE BOMB HAS EXPLODED — CHARCOT FOOT
Pathogenesis, classification and evidence based management
Possible future interventions
Ketan Dhatariya, Consultant in Diabetes, Endocrinology and General Medicine, Elsie Bertram Diabetes Centre, Norfolk and Norwich University Hospitals NHS Foundation Trust, Norwich

12.45-13.15 WHAT HAPPENS WHEN THE BOMB HAS EXPLODED — INFECTION
New developments
Biofilm based ulcer management
ESCMID guidelines
Rose Cooper, Professor of Microbiology, Cardiff Metropolitan University

13.15-14.20 LUNCH, EXHIBITION AND E-POSTER VIEWING
FDUK Annual AGM 13.15-13.40

14.20-14.50 WORKSHOP ROTATION 1 HELD IN THE QUEEN’S SUITE

1. TALKING TO PATIENTS ABOUT POOR OUTCOMES A PSYCHOLOGY APPROACH
Rosie Walker, Education Director, Successful Diabetes

2. THE PEACE PROCESS
Rehab after amputation what is available what to consider
Quality of Life post amputation
Eloise Davey-Smith, Post Graduate Research Student, Nursing & Health Care School, College of Medical, Veterinary & Life Sciences, University of Glasgow

3. BRINGING YOUR RESEARCH TO LIFE
Funding applications
Catherine Bowen, Professor, Health Sciences, University of Southampton

14.50-15.00 TRAVEL TIME

15.00-15.30 THE BURDEN OF WOUNDS TO THE NHS — DETAILED ANALYSIS OF TREATMENT FOR DIABETIC FEET
Distribution of treatments
Time on treatment and switching patterns?
Long-term outcomes
Julian Guest, Founder and Managing Director, CATALYST
Duncan Stang, Diabetes Foot Coordinator for Scotland and Scottish FDUK Representative, Lanarkshire

15.30-15.40 TRAVEL TIME

15.40-16.10 WORKSHOP ROTATION 2 – HELD IN QUEEN’S SUITE
(see above sessions)

16.10-16.15 TRAVEL TIME

16.15-16.45 WORKSHOP ROTATION 3 – HELD IN QUEEN’S SUITE
(see above sessions)

16.45 CONFERENCE CLOSE
Wounds International invites you to

ACHIEVING A STEP CHANGE IN PRESSURE ULCER REDUCTION

ADVANCES IN PRESSURE-RELIEVING SURFACES – A NEW CARE DELIVERY MODEL

Real-world data has shown a 56% reduction in pressure ulcer occurrence resulting from the use of an innovative pressure-relieving surface. Hear from leading clinical experts as they discuss the impact of these advances on prevention and improved patient outcomes.

Broadcasting on 24 November 2016 at 08.00am GMT, 11.00am GMT & 5.00pm GMT*

Followed by your chance to ask the experts in a LIVE Q&A session

Chaired by Professor Keith Harding
Presentations by Jacqui Fletcher and Matt Tite
