INTRODUCTION

Dear Customer,

O’Flynn Medical is a family business established in 2000. We have a 25 - strong team of professional staff operating from our headquarters in Millstreet Co. Cork and from our regional depots in Dublin, Clonmel, Tralee and Galway.

We use world class manufacturers to ensure we provide unrivalled products and services to all our customers.

As a company we continually strive to provide solutions that meet the challenging healthcare demands and are very proud of the services we provide to our many customers. Our technical, clinical and sales teams work tirelessly to provide excellent backup and support at all times. Please contact me or any member of the team to answer any queries you may have in relation to the products and services that we at O’ Flynn Medical offer in this catalogue.

Kind Regards,

Tadhg O Flynn.
Domus 4
Pressure Relieving Mattress

The Apex Domus 4 is a pressure relieving mattress designed to offer high levels of support in both the community and acute settings.

An alternating dynamic mattress system, it has a simple to use and intuitive weight setting function, enabling the care giver to simply set the mattress up according to the weight of each patient, reducing the risk of incorrect weight settings being entered.
Features and Benefits

- **Alternating Therapeutic Mode**: Redistribution over a ten minute cycle time
- **Cell on Cell Design**: Higher levels of support and comfort throughout the therapeutic pressure relieving cycle. Cell on cell design also facilitates patient transfer
- **Seat Inflate Mode**: When a patient is in the upright position, the seat inflate mode increases the pressure throughout the mattress in order to better support the sacral area
- **Max Firm Mode**: Hyper inflates the cells providing a firm surface for moving, handling and nursing procedures. Max Firm Mode lasts for 20 minutes and will then revert back to Alternating Therapeutic Mode
- **Low Pressure Alarm**: Alerts the caregiver if there is a loss of air pressure in the mattress.
- **Power Failure Alarm**: Notifies the caregiver when there is a loss of power
- **Service Fault Indicator**: Alerts the caregiver when the mattress needs to be repaired
- **Lock Out**: Automatically locks the control panel to help prevent the changing of settings inappropriately
- **Static Mode**: Addresses areas of high contact pressure by redistributing the body mass over a greater surface area through a process of immersion, which is achieved by reducing the mattress pressure by up to one third across the whole surface area of the mattress
- **CPR**: The CPR toggles are located at the head end of the mattress and are designed to be highly visible and easy to use in an emergency
- **Transport Mode**: Transport Mode is designed to be simple and easy to use. Its simple click in design also means it is robust and easy to keep clean

Domus Auto
Fully Automatic Pressure Relieving Mattress

The Apex Domus Auto is a fully automatic pressure relieving mattress designed to offer high levels of support in both the community and acute settings.

The Domus Auto dynamic mattress system *automatically calibrates in accordance to the patients weight and position in the bed*, eliminating the risk of injury to the patient by the caregiver entering the patients weight incorrectly.

The Domus Auto is suitable for both the prevention and management of pressure ulcers in a variety of healthcare environments. It is a highly versatile and cost effective solution to pressure area care.

Pro-Care Auto
High Specification Pressure Relieving Dynamic Mattress

The Apex Pro-care Auto is a high specification pressure relieving dynamic mattress designed to offer exceptional levels of support in any healthcare environment.

The Pro-care Auto dynamic mattress system automatically calibrates in accordance to the patients weight and position in the bed, eliminating the risk of injury to the patient by the caregiver entering the patients weight incorrectly.

It is suitable for all types of patient from pressure ulcer prevention right the way through to managing the most severe pressure ulcers.

The Pro-care Auto is one of the only mattresses on the market that has a designated heel zone allowing the caregiver to float the heel, meaning they can comply with EPUAP guidelines on pressure ulcer management in the heel area.
**Features and Benefits**

- **Designated Heel Zone:** Allows the caregiver to isolate individual air cells in the heel area for 100% pressure offloading.

- **Auto Adjust:** Automatically adjusts the internal cell pressures depending on the individual patient’s weight and position on the mattress.

- **Alternating Therapeutic Mode:** Continuously and sequentially inflates and deflates the air cells to allow for pressure redistribution over a ten minute cycle time.

- **Static Mode:** Addresses areas of high contact pressure by redistributing the body mass over a greater surface area through a process of immersion.

- **Seat Inflate Mode:** When a patient is in the upright position, the seat inflate mode increases the pressure throughout the mattress in order to better support the sacral area.

- **Low Pressure Alarm:** Alerts the caregiver if there is a loss of air pressure in the mattress.

- **Power Failure Alarm:** Notifies the caregiver when there is a loss of power if the mattress is unplugged.

- **Max Firm Mode:** Hyper inflates the cells providing a firm surface for moving, handling and nursing procedures.

- **Service Fault Indicator:** Alerts the caregiver when the mattress needs to be repaired.

- **Lock Out:** Automatically locks the control panel to help prevent the changing of settings inappropriately.

- **Rectangular Sacral Cell on Cell Design:** Unique cell design offers the patient more support and comfort in the Sacral area throughout the therapeutic pressure relieving cycle. Facilitates patient transfer.

- **Cable Management:** The left hand side of the mattress has a cable management system allowing the power cable to be stored off the floor during operation.

- **No minimum weight**

Serene
True Low Air Loss Pressure Reducing Mattress

The Apex Serene is a modern and innovative True Low Air Loss mattress system designed for use in both the Acute and Community sectors, offering pressure reduction for patients who are better suited to this type of therapy.

The Serene can also help with Micro Climate Management by helping to increase the Moisture Vapour Transmission Rate with its low air loss technology as the pump provides 120 litres/minute of air flow from the mattress.

The Serene Low Air Loss mattress replacement system provides immersion and envelopment therapy for the patients, which will help to reduce the pressure on the patients body across its whole surface area.

The Serene mattress also comes with an innovative cell on cell design offering support to the patient during power failure or transport.

Pressure Relief Risk

- Low
- Med
- High
- V High
**Features and Benefits**

- **Weight Setting:** The weight setting function on the Serene has been designed to be as simple to use and intuitive for the caregiver as possible.

- **Max Firm Mode:** Hyper inflates the cells providing a firm surface for moving, handling and nursing procedures.

- **Two Way Zip:** The top mattress cover comes with a Two Way Zip which reduces the risk of ingress of unwanted fluids. Removable cover for laundering and replacing.

- **Low Pressure Alarm:** Alerts the caregiver if there is a loss of air pressure in the mattress.

- **Power Failure Alarm:** Notifies the caregiver when there is a loss of power.

- **Fault Alarm Code Indicator:** If the mattress does suffer a technical malfunction an audible alarm will sound and a fault code will be displayed to alert the user to the exact fault.

- **Service Fault Indicator:** Alerts the caregiver when the mattress needs to be repaired.

- **Lock Out:** The pump automatically locks the control panel after five minutes to help prevent the changing of settings inappropriately.

- **Seat Inflate Mode:** When a patient is in the upright position, the seat inflate mode increases the pressure throughout the mattress in order to better support the sacral area.

- **Designated Heel Zone:** The Serene has a heel zone section to help increase immersion and redistribution of pressure around the heel area.

- **Cable Management:** The left hand side of the mattress has a cable management system, allowing the power cable to be stored off the floor during operation.

- **True Low Air Loss:** continuous Low Air Loss enables the patient to fully immerse into the mattress.

- **Cell on Cell Design:** The cell on cell design offers the patient higher levels of support and comfort throughout the therapeutic pressure relieving cycle. Facilitates patient transfer.

- **Battery back-up**

Sofcare Low Risk Mattress

The Stryker Sofcare mattress is available as an overlay or full replacement mattress.

It is a pressure management system with 3-layer air-channelling technology which creates interlocking air cells to immerse and envelop the patient providing low tissue interface pressure. This mattress both prevents pressure sores but also assists in the treatment of pressure sores. A very effective mattress at an affordable cost.

Features and Benefits

- **Constant low pressure** - The max pressure in the mattress is 32mmHg
- **Designed with three layers**: Redistributes the patients weight evenly over the mattress surface and effectively reduces tissue interface pressure below the level of capillary closure
- **Composed of more than 300 interlocking, inflated cells**: Air distributes itself according to patients movement
- **SofCare can be used with or without a “companion” pump**: This Pump is easy to use and automatically maintains the correct pressure, so mattress never needs manual inflation or re-inflation
- **Maximum capacity of 40 stone with no minimum weight**
- **Totally flat when deflated and easy to clean**
- **Full replacement or overlay mattress available**
- **Manual inflator or companion pump available**
Eole DC

The Stryker Eole DC is a constant low pressure active support surface. Using alternating pressure technology that assists in managing pressure through its deep cell technology and special heel section, this high risk mattress is suitable for the prevention and treatment of pressure ulcers.

Features and Benefits

- The mattress optimises immersion which is gentler on patients skin
- No minimum patient weight - maximum patient weight of 32 stone
- Gentle alternation for patient comfort
- Easy to use pump
- Special heel section for greater effectiveness for preventing and treating pressure sores in the heel area
- Dimension of mattress – 90cm x 20cm x 200cm

 IsoGel/IsoFlex

The Stryker Isoflex support surface is a static, gel, high risk mattress. It isolates the three key contributors of skin breakdown — pressure, shear and microclimate imbalance.

The exclusive Equilibrium by Dartex cover equalises pressure redistribution while balancing the microclimate of the skin through its highly breathable yet durable fabric.

**Pressure Redistribution**

IsoGel support surface redistributes pressure in the sacral region with its CoreGel technology. CoreGel technology redistributes pressure by buckling and absorbing the patients weight, allowing immersion and envelopment to take place.

**Shear Management**

ShearGel moves freely with the patient to help minimise shear forces at the interface between the surface and the patient. The Equilibrium by Dartex cover wicks away moisture from the patient.

This mattress is suitable for the prevention and treatment of the most severe pressure ulcers.

**Features and Benefits**

- Convertible design – A pump may also be added to provide even greater moisture control on patients skin
- Equilibrium by Dartex cover wicks away moisture from patient
- Foam crib and base provide stability and lateral support
- Patented grid-like gel material affords maximum memory, flexibility and durability
- Latex free
- Static mattress – Suitable for patients who would prefer a solid surface
- Gel comes with a 10-year warranty
IsoAir DC

The Stryker IsoAir DC is a powered therapeutic support surface that assists in managing pressure, shear, and moisture to help protect patient skin through a deep cell, low air loss design.

Iso Air’s exclusive active sensor technology automatically adjusts pressure within the air cells and helps to control immersion while either static or alternating low pressure therapy is engaged. The Iso Air DC is a high risk mattress which is suitable for the prevention and treatment of the most severe pressure ulcers.

Features and Benefits

- Active sensor technology – monitors patient movement and position in bed and adjusts pressure to suit
- Alternating Low Pressure for greater comfort and clinical effectiveness
- Deep Cell for maximum clinical effectiveness
- Low Air Loss to control moisture on patients skin
- No minimum patient weight with max patient weight of 40 stone
- Individual, independent, interchangeable cells for easy maintenance
- Lateral side bolsters for greater patient comfort
- Sizes Available – 213cm or 203cm long; 81cm or 89cm wide.

Pressure Relief Risk

Low  Med  High  V High
Scan Turn Rotational Mattress

The ScanTurn Lateral Rotation System is designed to limit the effects of pressure and immobility by providing lateral rotation and subsequent pressure relief. The degree of tilt and the length of time spent in the tilt position can be programmed to meet the patients clinical and comfort needs, whilst at the same time taking into account the care setting. The mattress has an integral heel cushion which helps improve positioning and heel alignment during rotational therapy and the foam crib provides stable side supports to aid transfer and promote independence where possible.

### Features and Benefits

- Compact & Lightweight Control Unit
- Microprocessor Controlled
- Automatic Rotation
- Up to 40° Rotation
- Manual Operation
- Left/Right angle tilt
- Variable Position Time
- Hold Mode
- Foam Crib
- CPR Release
- User Friendly Controls / Operation
- 2 Way Stretch Cover
- Vapour Permeable Cover
- Maximum Inflate Mode
- 2 Piece Outer Cover
- Lock Out Mode
- Audible & Visual Alarm
- Detachable Hose Section

Sapphire Comfort Turn
Rotational Mattress

The Sapphire Comfort Turn combines true low air loss with full body lateral rotation capabilities in a complete mattress replacement system.

The microprocessor controlled blower unit features up to a 40° “Full Turn” and “Right Turn” modes of rotation.

These rotation modes have a minimum cycle time of 3 minutes and a maximum of 90 minutes. The “Turn & Hold” feature allows the caregiver to rotate the patient to the left or right to help administer the patient.

**Features and Benefits**

- 3 modes of therapy, static low air loss, alternating low air loss and continuous lateral rotation with low air loss
- Full body lateral rotation
- Lockout to eliminate unintentional setting change
- Variable rotation cycle times from 3 to 90 minutes
- Automatic fowler feature for seat inflation when head is elevated
- Acute and community mattress featuring high strength air cells
- Turn and hold feature
- Low pressure/power failure audible and visual alarms

Features and Benefits
- Constructed from a series of ‘keyhole cut’ cells to evenly distribute weight
- Multi stretch / water resistant outer cover
- Polyurethane fabric to help reduce shear and friction forces
- White inner liner allowing easy inspection for strikethrough or other cover damage
- Double sided castellated foam which allows user to flip and rotate which contributes to longer life span of the product
- Zip around three sides to allow easy inspection of the foam and for laundering

Technical Specifications
- Height: 140mm
- Weight: 14kg
- Max User Weight: 140kg
- Cleaning: 80°
Flexi-Form
High Performance
Foam Mattress

The Flexi-form non-turn high risk mattress features a composition of high specification foam and a top layer of visco elastic foam with a castellated surface. This offers enhanced submersion and excellent pressure reduction, whilst also providing optimum patient support. This is a highly durable product.

Features and Benefits

- Highest specification foam and visco foam composition featured in this product allows wide castellation for maximum air flow and enhanced microclimate
- Minimised shear and friction due to smooth stretchable cover
- Castellation allows for patient movement and effective surface profiling
- Non-turn
- Best use direction clearly printed on cover
- Extensively tested waterproof covers washable at 95 degrees Celsius
- High frequency welded seams prevent fluid ingress
- Zips covered by double sided full length flaps
- Foam and covers replaceable individually

Conform Cushion

CONFORM Cushions provide considerable relief to patients when forced to remain seated for an extended period of time.

The design of the interlinking air chambers imitates the positive characteristics of water. CONFORM Air Cushions adjust to the natural body contours hence reducing pressure build up and preventing shearing forces.

- CONFORM cushions offer the very highest seating comfort, limiting the danger of pressure sores and can be used therapeutically with existing skin problems
- The material used to produce these cushions, achieves the highest level of seating comfort
  The high elasticity results in pressure relief which assures the blood flow in the capillaries
- The cushions are used from stage of prophylaxis up to pressure ulcer (Grade 3/4 Rem. with grade IV it is recommended not to sit).
- The design of the interlinking air chambers imitates the positive characteristics of water.

Features and Benefits

- Made of non-allergenic natural rubber
- Custom sizes made on demand
- 1, 2 and 4-chamber versions
- Tailor made sizes can be manufactured
- Sea-water-resistant
- Cushion and cover can be washed in the washing machine
- Individual applicable cover plates to suppress cells to go to zero pressure in specific areas

- The 5cm high cushions are mainly used to increase seating comfort or as prophylactic cushions.
- 7.5cm high cushions offer a high standard of seating comfort, but also have a noticeable therapeutic effect due the high level of pressure relief.
- 10cm high cushions serve as an effective instrument in Decubitus Ulcer therapy and more commonly used for Bariatric Patients.

Also available as a RING CUSHION, please contact us for more de
High Risk Preventative Gel Cushion

The High Risk Preventative Gel Cushion with PU cover can be used for general seating purposes, wheelchair and as a surgical aid. The combination of foam and gel provides a high degree of comfort while retaining its shape.

**Features and Benefits**
- Two-layered design for maximum pressure relief
- Combination of slimmer-shaped foam with covered gel-sac
- Reducing interface pressure and cools to eliminate perspiration
- To assist protection and comfort of ischial and sacral areas
- Top cover machine washable

**Sizes Available:**
- 41cm x 41cm x 6.5cm
- 43cm x 43cm x 6.5cm
- 45cm x 45cm x 6.5cm

**Pressure Relief Risk**

SofCare Chair Cushion

The Stryker Sofcare cushion has a unique air-channeling technology that redistributes a patient’s weight to reduce tissue interface pressure. This unique 3-layer air-channeling technology creates interlocking air cells to immerse and envelop the patient, providing low tissue interface pressure. The 3-layer design provides total air support, which helps to prevent bottoming out, because the patient is always supported by a pocket of air.

**Features and Benefits**
- Assists in the prevention of pressure sores
- Easy to clean
- Unique air channelling technology - pre-inflated
- Redistributes patients weight
- Reduces tissue interface pressure
- Easy to use and waterproof
- Standard size: 18” x 18”

**Pressure Relief Risk**
**Stryker SofCare HeelCare Boot**

A lightweight, comfortable and easy to use boot for the heel and foot. The adjustable SofCare HeelCare Boot lifts the heel off the bed surface, protecting it from pressure ulcer formation and allowing for air circulation.

**Features and Benefits**
- Elevates the heel providing zero pressure
- Cost effective for pressure ulcer prevention and treatment
- Lightweight, pre-inflated and ready to use
- Soft inner lining provides patient comfort and absorption
- Easy access and visibility of heel
- Adjustable straps allow you to customize fit
- Interconnected air cell design equalizes pressure providing proven relief to entire lower limb
- Soft, pliable edges and straps
- Grommet hole for designated traction applications including Buck’s traction, on longer model

**Novacare Heelcare Boot**

The Novacare Heel Protector is a high-quality alternative to conventional heel protectors. Due to the generous dimensioning it not only protects the heel optimally, but also the ankles. Easily cleaned by hand or dry cleaning. Disinfectable using VAH listed disinfectant cleaners.

**Features and Benefits**
- Reliable pressure reduction
- High durability
- Easy cleaning
- Excellent shear reduction
- High user friendliness
Pro-Care Bariatric
High Specification Pressure Relieving Dynamic Mattress

The Apex Pro-Care Bariatric Mattress comes with two different widths. 42” and 48” mattress, both with the maximum weight capacity of 450kg.

With its rectangular designed cells, the system also provides optimal pressure relief and comfort due to its capability to widely disperse pressure exerted at single points of contact.

The digital panel setting with weight guidance, adjustable cycle time and optional modes including alternate, static, max firm, and seat inflate are also available to meet the treatment needs for each individual. The antimicrobial filter and stretch cover is available for patients which allow them to receive the same high quality of care and comfort.
Features and Benefits

- **Max Firm Mode**: Inflates mattress to its firmest level for maximum stability. It will return to alternating therapeutic mode after 20 minutes.
- **Static Mode**: For patients sensitive to alternating mode, static mode facility available.
- **Seat Inflate+ Static Mode**: For stable support in seating position. This provides support with additional pressure to redistribute pressure centralized at sacrum area and avoid excessive sinking while sitting.
- **Seat Inflate+ Alternating Mode**: May apply to patient with rigid muscles. This provides support with additional pressure during alternating mode to relieve pressure centralized at sacrum area.
- **Alternating Mode**: Periodically 1-in-2 alternating cycle mode with four available cycle times: 10, 15, 20, 25 minutes.
- **Heel-Relief Cells**: Protecting vulnerable heels. With Heel-Relief connector, heel can be suspended in air to completely eliminate pressure exerted to the heels.
- **Thoughtful Carrying Handles**: Simple way to transport bariatric patients. Four sets of carrying handles are designed at the 2 sides of mattress to facilitate caregivers to transport the patients by lifting the whole mattress.
- **Cell-on-Cell QubiCell™**: Optimal distribution and power failure protection. Cells conform to the contours of the body structure and movement. The inner cells can provide hours of support even during power failure.

Titan Bariatric Bed

The combination of X-ray cassette, special functions, higher loading capacity and optimal patient area width makes the TITAN bed a mobile unit for bariatric patients which minimizes the necessity of patient transfer from bed to bed and makes the work of medical staff easier.

The bed offers the following fully electrically operated functions, reversible lateral inclination, Trendelenburg, Antitrendelenburg, extension of the loading area, cardiac chair, anti-shock position and many more.

A great advantage of the bed is the easy exit function, which enables the patient to leave the bed directly without the necessity of further rotation at the loading area.

The bed can be equipped with a special high-risk air mattress which can extend in length to suit the bed.

A robust steel structure, which gives the bed capacity of 500 kg (1100 lbs.).

Bariatric beds of TITAN series are suitable for all hospital departments.
Features and Benefits

- Maximum safety
- Loading capacity 500 kg
- Direct get off position
- Lateral rotation therapy
- LED nurse control panel
- Scale system
- Foot control panel with safety button
- Patient satellite control panel
- Central brake
- X-Ray compatibility
- Unbroken bed alarm
- Divided folding side rails

Bariatric Heavy Duty XXL Fortuna Wheelchair

Our heavy duty Fortuna wheelchair meets the highest expectations, is easily adaptable to deal with different disorders and is absolutely user friendly.

Depending on model it can carry weights up to 62stone / 400 kg with both self-propelled and a transit model available.

This wheelchair is easily foldable, making it simple for transport.

Wheelchair dimensions such as the seat width, seat depth and frame colour can be made to order.

**Features and Benefits**

- Multiple brace system
- Solid PU 24” rear tyres
- Solid PU 8” front tyres
- Canvas cushioned back rest and seat system
- Full length removable armrests
- Swingaway detachable legrests
- Seat height 50cm
- Seat depth 40cm
- Back rest height 40cm
- Hand grip height 92,5cm (with folding back rest 94cm)
- Push-to-lock brakes
- Seat widths 38cm to 100cm
- Seat depths 40cm, 45cm, 50cm, 55cm and 60cm
- Seat height 43cm, 45cm, 47cm, 50cm, 55cm and 60cm
Bariatric Eclipse XXL Wheelchair

The Vermeiren Eclipse XXL Bariatric wheelchair is made of lightweight aluminium with a double crossbar axle which provides additional weight capacity support.

**Features and Benefits**
- Maximum Weight Capacity of 200kg
- Seat widths available: 60cm, 65cm, 70cm and 75cm
- Seat and back support are anatomically designed
- Optimal seating comfort with pressure distributing properties
- Reinforced rear wheels, can support a maximum weight of 200kg
- Easy transfers thanks to the foldable aluminium footplate in one piece
- Adjustable heel strap

Bariatric High Back Chair

The High Back Orthopaedic Chair is a height adjustable, metal framed high back orthopaedic chair.

**Features and Benefits**
- Height adjustable
- Adjustable seat depth
- Heavily padded for maximum comfort

WINGED VERSION
Atlanta

A robust and durable chair which provides a safe and comfortable seat for those with vigorous involuntary movements while reducing the risk of falling from the chair.

The Atlanta is necessary to comfortably accommodate individuals who may be challenging to seat. It is unique in that it provides security without compromising function, pressure or postural management.

The Atlanta is effective for adults with the following disabilities and conditions:

• Huntington's disease
• Alzheimer’s disease
• Lymphoedema
• Cellulitis
• Advanced dementia
• Parkinson’s disease
• Brain injury

Monaco

The Monaco is ideal for users with reduced mobility or sitting balance who require comfort and support without compromising independence in transfers and function.

Its unique angle adjustable seat creates an optimum and safe sitting position when adjusted posteriorly. It reduces sliding, discomfort and shear as it helps to maintain positioning of the pelvis.

It can also be adjusted to assist with stand transfers and independent ambulation.

The Monaco is effective for seating clients who:

• Continually slide from chairs
• Need assistance with mobility
• Have flexible joint contractures
• Are at risk of pressure ulcers
• Have oedema or swelling in the lower limbs
• Have tight hamstrings

The Monaco is effective for those with the following conditions and disabilities:

• Minor stroke
• Reduced mobility
• Poor sitting balance
• Lower limb swelling and oedema
• Post - operative rehab needs
• Postural problems
• Pressure management needs
Phoenix

The Phoenix is the most supportive and functional of the Seating Matters chairs and is available in both adult and children’s sizes.

Designed to give maximum support to the upper body through lateral and head supports, the Phoenix will also adapt to the changing needs of a person being rehabilitated or meet the long term needs of a progressive condition.

The Phoenix is effective for adults with the following disabilities and conditions:

- Cerebral palsy
- Spina bifida
- Spinal cord injury
- Parkinson’s disease
- Motor neurone disease
- Stroke
- Multiple sclerosis
- Alzheimer’s disease
- Advanced dementia
- Osteoporosis
- Also available in Bariatric size

Sorrento

A simple to operate and stylish chair which is designed to improve and maximise comfort as well as postural support and pressure management.

With its adaptability and effortless adjustability, the Sorrento lends itself easily to multi-user environments where the seating needs differ between users. The Sorrento can be readjusted to suit the needs of a new user meaning their comfort, posture and pressure management remain uncompromised.

The Sorrento is effective for adults with the following disabilities and conditions:

- Cerebral palsy
- Spinal cord injury
- Head injury
- Stroke
- Multiple sclerosis
- Parkinson’s disease
- Motor neurone disease
- Dementia
- Alzheimer’s disease
- Also available in Bariatric size
HOISTS and STAND AIDS
Roze Stand Assist Hoist

Versatile and safe - The Invacare Roze Stand Assist offers an alternative to a passive lift when a degree of weight bearing ability remains. Ideal for rehabilitation, degenerative conditions and clients whose condition varies from day to day, the Roze can provide dignity and a greater degree of independence. With the latest control box technology, the Roze offers a ‘Soft Start’ and ‘Soft Stop’ function that provides a more comfortable transfer. Combining a range of adjustable features with a lightweight aluminum construction, the Roze is equally at home in Residential and Acute Care environments.

Features and Benefits

- Reduces manual handling injuries
- Ergonomic lift angle designed to minimise shear
- Two types of transfers; standing assistance or seating assistance
- Very compact, which makes it easier to manoeuvre in smaller spaces
- Safe and reliable because of several safety mechanisms
- Intelligent monitoring system
- Fitted with a control box that has a diagnostic system: an intelligent service lifetime monitoring system that highlights the battery status and service condition of the actuator to ensure safe patient handling
- The padded leg support can be adjusted for different needs
- The foot plate is horizontal and can be removed for standing / walking a patient during rehabilitation
- 200kg maximum weight capacity
Birdie Transfer Hoist and Birdie ‘Compact’ Transfer Hoist

With maximum space for the client, both the Birdie and the Birdie Compact offer a truly comfortable lift and transfer to or from beds, chairs or even the floor. Ideal for use in domestic and residential care environments, the hoists are designed to fold and unfold easily without the need for tools.

The high boom maximises space for the client even when the hoist is in the highest position. This gives an ergonomic lift and transfer as the client can be easily rotated 360°, which makes positioning much easier for the carer. The optimisation of space allows increased space in front of the actuator, reducing the risk of injury to the client’s knees.

Handling the hoist has been made as smooth and easy as possible as the hoists can easily be folded and unfolded without the need for tools. Hoists take up minimal space when stored and are easy to push and transport. If required, the mast and boom can be easily detached from the base (no tools required).

For total security, the folding mechanism has a snap-lock system, thus minimizing the risk of accident. The Birdie and Birdie Compact are CE-certified in line with the Medical Device Directive 93/42/ECC.

To ensure the hoists comply with EN ISO 10535 (the European standard for hoists) the hoist has been rigorously tested both by Invacare and the German TÜV institute, an accredited external body.
Features and Benefits

- **Long boom – high user comfort** - The client can easily be rotated and positioned
- **No risk of injuries to the knees**
- **Easy to fold and dismantle** - Ease of transport and storage. No tools required when folding / unfolding or when dismantling the hoist
- **Snap lock** - Optimal security
- **Emergency stop, lowering and integrated charger** - Manual or electric emergency lowering (compact version only electric lowering). Control box is supplied with detachable or fixed battery
- **Clip on spreader bar** - Easy to change the spreader bar – just twist the safety catch, press to open – and then detach / attach the spreader bar
- **Electrical leg spread** - Birdie Models only
- ** Mounted spreader bar** - Correct and safe positioning of the spreader bar. A locking carabiner offers exceptional security
- **Manual leg spread** - Simply step on the pedal to adjust the leg spread - (Birdie ‘Compact’ Models only)
- **Handle for leg spread** - Handle can easily be attached to operate the manual leg spread.
- **Push bar and hand control** - Superior ergonomics for carers
- **4 point quick release spreader bars** - Easy to attach and detach. Available widths: 45cm or 55cm
- **Max Capacity** - 180kg
Jasmine Transfer Hoist

The Invacare Jasmine Mobile Lifter is a flexible solution that offers a high level of comfort for all clients. A versatile lifter, the Jasmine provides safe patient handling up to 32 stone (200kg) weight capacity.

Features and Benefits

- Expansive, wide-opening base
- High lifting mechanism
- Easy manoeuvrability and positioning
- ‘Soft Start’ and ‘Soft Stop’ function
- 2 or 4-point spreader bars - In widths: 450 mm and 550 mm
- Also available with a scale (approved according to medical standard EN 45501-certified and sealed)
- Intelligent monitoring system includes a service reminder, emergency operation, audio battery alarm, and battery indicator
Slings

Our range of slings provides a safe and comfortable transfer solution for many types of physical disability. The selection of high quality slings have been developed to ensure optimal fit and support for the user and ease of application for the carer.

Features and Benefits

- Suitable for Transfer and Stand Assist Hoists
- Available in five sizes (S / M / L / XL / XXL)
- A range of adjustments enable the slings to meet the specific needs of the individual
- Hammock and toileting slings available
ELECTRIC PROFILING BEDS
Malsch Low Low Bed - Acute

The Malsch bed is a new addition to our product range. Its innovative low voltage power concept clinical bed offers increased safety for patients and nursing staff.

The integrated collision protection guarantees adequate floor clearance when inclining the bed, even when bed extension is activated. The safety operating units are perfectly aligned with each other, and facilitate the targeted restriction of the patient hand control.

The full range of functions is also available in battery mode. Immediate reaction functionality in an emergency is provided by the bed front, which can be removed without tools, together with the CPR function. The use of high quality materials guarantees outstanding stability with unladen weight.

Enclosed, homogeneous surfaces also aid fast, thorough cleaning or disinfection. Our cabling concept accommodates only one more plug socket on the bed. Other components can be added at any time.

**Features and Benefits**

- Innovative motor concept
- Bed fronts can be removed without use of any tools
- ABS hygiene plastic lying surface
- Easy cleaning and disinfection
- Easy manoeuvrability with 150 mm double casters and weight-saving aluminium components
- 3 stage braking system
- CPR function, electric and manual
- Integrated bed extender
- Mobilising side rail system
- Feeding rail on both sides
- Comfortable design, high quality materials
- Ideal for preventing falls with a height of 30cm in the low position
- Comfortable and ergonomic work position is achieved for the care personnel through adjustment of the care position
- This position moves the patient to a comfortable, up-right sitting position, ideal for watching television, treatment or communication
- The shock position aids emergency compensation for a lack of volume and can be applied quickly via an automatic program on the nursing staff operating unit
Vermeiren LUNA Low Low Profiling Bed

The Vermeiren Luna Low Low Bed is a four-section electric profiling nursing bed with a low profile height that is suitable for people who are at risk of falling out of bed.

The height-adjustable, profiling bed has four sections and comes with a controller for adjusting height, head support and knee buckle.

Features and Benefits
- Powder-coated steel base and frame
- Mounted on locking castors for manoeuvrability
- Can be fitted with a lifting pole if required
- Steel head and foot boards have wooden inserts
- Wooden side rails can be adjusted or completely detached
- Comfortable and practical
- Can be extended in length

Woburn Low Profiling Bed

The Woburn Low Profiling Bed has been recently upgraded to include high quality control systems, a reduced platform and is now able to hold a higher weight capacity. Purpose built to lower to 220mm, the platform can bring patients closer to the floor significantly reducing the risk of injury for those likely to roll out of bed.

**Features and Benefits**
- Safe Working Load – 220kg / 34 Stone
- Adjustable Height – 220mm – 650mm
- 9v Battery Backup
- Low Voltage – 29v
- Wrap-around Wooden Head and Foot Boards
- Lockable Handset
- 4 Section Profiling
- Supplied with a comprehensive manual
- Collapsible side rails with safety catch
- Ideal for the care sector

- Lifting Pole
Woburn Ultra Low Profiling Bed

The Woburn Ultra-Low Bed boasts unique features allowing the platform to be lowered 67mm off floor level which provides user safety and reliability.

Being able to lower to just 67mm from floor level, the bed is built for use without the need of side rails. Should the user be inclined to roll whilst in bed, and potentially fall, the bed reduces impact and allows the user to safely roll onto the floor, or a fall mat.

The Trendelenburg Function is supplied with the bed as standard, which allows the user to be positioned upright if necessary. This feature can create a seated effect if applied with the knee break.

Features and Benefits

- Safe Working Load – 185kg / 29 Stone
- Adjustable Height – 67mm – 640mm
- 9v Battery Backup
- Low Voltage – 29v
- Solid Wooden Head and Foot Boards
- Trendelenburg Function – allows the user to be positioned upright
- 0-300 Legrest Angle
- 0-700 Backrest Angle
- Lockable Handset
- 4 Section Profiling
- Ideal for many environments within the Care and Community sectors

WHEELCHAIRS
**708 Delight**
Self Propelled and Transit

The 708 Delight is our standard wheelchair with a fixed back. The armrests are foldable and removable and equipped with soft, extra long and comfortable padding. The fabric of the seat and back, together with aluminium leg rests, will provide optimal comfort while using this chair.

**Features and Benefits**
- Removable and foldable armrests with a comfortable padding
- Small side wheels on the footplates will protect your walls and furniture while moving around
- Rear wheels have a quick release system
- Sturdy armrests with an easy locking system
- Self propelled and transit available
- Easy to manoeuvre

**Eclips+ Wheelchair**
Self Propelled and Transit

The Eclips+ is a lightweight aluminium wheelchair with a fixed back and reinforced crossbar. Equipped with quick release rear wheels, ideal for fast transport with foldable and removable armrests.

**Features and Benefits**
- Ergonomic handles
- Foldable and removable armrests
- Rear wheels with quick release system
- Foldable footplates
- Various sizes available
- Self propelled and transit available
Inovys II

The new Inovys II brings an optimum comfort to the user. It is equipped with a back and a seat in Dartex high spe material for a perfect seating comfort. A new attachment system for the back rest allows adjustment in depth, height and angle. The seat is maintained by elastic straps for more flexibility and comfort making it possible to avoid pressure points. The Inovys II can be totally inclined, is easy to fold and even easier to disassemble for transport.

Features and Benefits
- Equipped with removable 24” Krypton rear wheels
- 200mm x 35mm front wheels
- Adjustable armrests in height and width
- Adjustable headrest in height, depth and width
- Adjustable seat depth
- Adjustable legrests
- Height of chair can be lowered without changing to smaller wheels

Optional extras:
- Table
- Safety belt
- Spreader
- Calf support with dartex padding
- Cannister holder

Bobby (Transfer) Wheelchair

The Bobby is your ideal compact, foldable transfer chair. Light and easy to fold in seconds. Either on holiday, hospital or airport for a transfer from point A to point B, the Bobby chair is easy to fold and to store and requires little maintenance.

Features and Benefits
- Two manual brakes
- Padded armrests
- Angle adjustable footplates
- Adjustable heelstraps
- Pull handles for fast folding
- Single brake on each rear tyre
- Foot pedal to tip the chair
- Foldable back with pouch
COMMODES and SHOWER CHAIRS
The Aquatec Ocean Shower Commode has a stainless steel frame. The seat tilt can be individually adjusted (tilt angle 0-35 Degrees), also with a stainless steel gas spring. The Aquatec Ocean is designed to be extremely stable even at maximum tilt angle.

### Features and Benefits

- Stable, stainless steel frame
- Individually adjustable seat height: no tools required
- Machine-washable adjustable backrest with quick-release buckles, can be adjusted to the user
- Space-saving push bar to enable optimal positioning over the toilet
- Ergonomic, swing-away armrests can be adjusted to two different height levels
- Height-adjustable, swing-away and detachable footrests for simple transfer
- Fold-away, textured footplates with heel
- Loops provide a safe position

Raised Toilet Seat

This Raised Toilet Seat without lid is designed to increase the height of your existing toilet seat and help individuals who need a boost sitting down or standing up from the toilet. It easily attaches tool-free to your toilet and locks in place using two rear locks.

Features and Benefits

- Designed for use with existing toilet seat
- Easily attaches to toilet bowl and locks in place with two rear locks
- Easy to clean
- No tools required for installation
- Two hygiene cutouts provide maximum convenience
- Available in 4” and 6” seat height
AMEDA BREAST PUMPS
Ameda Elite Breast Pump

Our Elite Breast Pump is a closed-system hospital grade pump intended to help mothers achieve more milk flow by enabling her to safely and effectively express and store milk when she is unable to nurse directly.

The Elite Pump is built for hospital use but is also available for mothers to rent and use in their own homes.

Features and Benefits

- **Hospital-grade** electric lightweight breast pump
- Adaptable for single or double pumping with 2 built in bottle holders
- CustomControl™ dual adjustability with separate speed and suction dials for complete control multiphase pumping, 100’s of different combination of settings
- “Whisper Quiet” operation for a comfortable pumping experience
- Ameda HygieniKit® Milk Collection System with Proven Airlock Protection™ helps protect breast milk and the baby from bacteria, mold and viruses while pumping
- Proven Airlock Protection™ (closed system) keeps tubing dry by preventing air flow between the expressed milk and pump tubing while pumping
- Custom Fit Flange System™ 7 Flange size options
- **International Code of Marketing of Breast-milk Substitutes compliant**
- Without BPA and DEHP
- Accessories available see page 68 (sold separably)
- Available for sale or rental
Ameda Lactaline Breast Pump

The Ameda Lactaline Double Electric Breast Pump is a closed-system, single user pump intended to help mothers safely and effectively express and store her milk when she is unable to nurse directly.

Designed for daily use, the Ameda Lactaline is ideal for working mothers or any mother who wants a fast, comfortable and easy pumping experience.

<table>

Accessories

CustomFit Breast Flanges and Hygienikits™

The breast flange is the funnel shaped piece that cups your breast and a good fit is very important! It can help make breast pumping comfortable and help you pump more milk. We offer a range of different flange sizes and inserts to ensure you find your best fit.

Sizes Available:

Hygienikits
- 30.5mm Breast Flange with 28.5mm inser
- 25mm Breast Flange

Custom Fit Flanges
- 36mm with 32.5mm Insert (Set of 2)
- 30.5mm with 28.5mm Insert (Set of 2)
- 22.5mm Insert

Store’N Pour Breast Milk Storage Bags

The Store’N Pour Breast Milk Storage Bags are a convenient storage solution for breast milk. With use of an adapter, these bags are compatible with all Ameda® HygieniKit® Milk Collection Systems.
- Store’N Pour Milk Storage Bag Starter Kit (20 Bags & 2 Adaptors)
- Store’N Pour Milk Storage Bags (40 Bags)

Features and Benefits
- Ideal for pumping directly into the bags, then seal and store in your fridge or freezer
- Easy-close zip seal so bags won’t leak
- Unique tear-and-pour spout helps prevent spills during milk transfer
- Gusseted bottom allows filled bag to stand on its own
- No more sticky tape or twist ties—unique flange adapters easily attach to pump kits and channel milk flow below the zip seal to prevent milk loss
- Freezer safe
MISCELLANEOUS PRODUCTS
Silent Knight® Tablet Crusher

The Silent Knight Tablet Crusher is a simple, safe and efficient way to crush medication from solid to fine powder. It is possible to crush single or multiple tablets quickly and effectively.

The Silent Knight does not function alone. Its companion item, the patented Silent Knight Pill Crusher Pouch is essential to guarantee maximum performance while reducing cost, waste, malfunction and lost time.

The pouch’s distinctive curved bottom structure assures full recovery of crusher medication. The thick, durable construction effectively reduces pharmaceutical cross contamination and eliminates loss of medication.

*Medications should never be crushed without the approval of a pharmacist or physician.

**Features and Benefits**
- Silent – will not disturb patients or staff
- Ergonomic Handle – fits all hand sizes
- Effective – powerful dual action crushes pills to powder in a few seconds
- Patient Safety – Eliminates cross contamination
- User Safety – Maximum results with minimal effort. Contour cover encloses internal moving parts
- Eliminates repetitive strain injury
- Efficient – crushes tablets in quarter of the time
- No loss of medication – accurate dosage

**STEP 1**
Place pill(s) into Silent Knight Pill Crusher Pouch.
Lift handle and place pouch down between the crusher plates to initiate crushing.

**STEP 2**
Press handle down to crush pill(s).
Lift handle and pull pouch upward to half way up the crusher plates.

**STEP 3**
Press the handle down to activate grinding movement.
Press handle down several times to grind pill(s) into fine powder. Repeat if needed.
Remove the pouch and add the medication to an appropriate serving medium for administration.
LinkTemp
(Non-contact thermometer)

LinkTemp is a professional grade thermometer that measures body (forehead), surface and room/ambient temperature instantly and accurately.

LinkTemp is a non-contact infrared thermometer that provides an instant and accurate way for clinicians to take temperature without contact in a multi-patient environment where efficacy, accuracy and efficiency matter every day.

**Features and Benefits**

- No probe covers required resulting in significant annual savings
- No contact with resident's skin which reduces the risk of cross-contamination
- Ideal for sleeping or combative residents
- Ideal for F-Tag 257 compliance (comfortable & safe temperature levels)
- Instant readings visible on a large, 2 color backlit LCD
- Visual/audible alarm if temperature reading exceeds 100.4°F
- Performs up to 100,000 readings
- Stores last 32 readings for easy recall
- Automatic power off (30 seconds)
- Long-lasting battery life
- Self calibrates which eliminates the need to service periodically
- Infrared sensor accurately reads temperature 1.2” - 2” (3 - 5cm) from centre of forehead
- Obtain readings with little to no patient involvement
CURBELL Fall Management System

Curbell’s full line of fall management monitors and sensors makes it easy to achieve your fall reduction goals and minimise injuries. They are simple for staff to use and full of features to make their lives easier and your patients more comfortable.

Advanced Bed And Chair Monitor

A patient who moves around a lot may move off of the sensor pad for a few seconds, causing a false alarm. The Advanced Bed and Chair Monitor features a delay control that helps prevent false alarms when the patient momentarily moves off the sensor pad, and an easy access reset button. These monitors also allow connection to your nurse call system, a call cord for increased notification capabilities and AC power.

Bed And Chair Sensor Pads

To meet the needs of different patients and situations, Curbell’s chair and bed sensor pads are ideal and are available in a variety of sizes and styles.

Bed sensor pads provide more surface area for monitoring restless patients, thus reducing nuisance alarms.

Chair sensor pads allow for more immediate alarm notification if the patient shifts out of normal position.

Features and Benefits

- **Ease of Use** - dedicated button for quick access to volume control
- **Flexibility** - alarm delay setting helps prevent false alarms when the patient momentarily moves off the sensor pad
- **Durability** - strain relief helps prevent damage to the sensor pad cord
- **Specifications for Monitor**
  - Size: 5.3” H x 3.5” W x 1.7” D
  - Power source: 4 AA batteries (included) with AC backup (optional)
Vitrectomy Recovery Chair

The Vitrectomy Recovery Chair is designed to maximise comfort during the recovery period after macular hole surgery and detached retina surgery.

Our Vitrectomy Recovery Seated Support Chair is the perfect solution for comfortable face down recovery throughout the day. Its ergonomic design provides the proper support for your back and neck.

Features and Benefits

- 8kg in weight
- 160kg weight capacity
- Soft upholstery and padded arm rest
- Adjustable seat, arm rest, chest pad and face cradle
- No tools required for setup
- Folds flat for easy transportation
- Includes carrying case
- Rental option available

The base of the Vitrectomy Recovery Chair has four individual legs that distribute the patient’s weight evenly, making it very stable. It has a large arm rest area that houses the reverse mirror beautifully, allowing the patient to watch TV, work on the computer, or look at people while conversing.

Face Down Sleep Support

Our Vitrectomy Recovery Chair can be adjusted to cater for patients who MUST sleep with their face down. It can also be used on the patients own bed. Using this piece makes stomach sleeping comfortable for patients who are used to sleeping on their backs, and ensures they will stay on their stomachs through the whole night.

This versatile support can also be used at a desk on a table or while travelling, providing even more options for the patient to assure proper head positioning at all times.

E: info@oflynnmedical.com | www.oflynnmedical.com
Crash Mat

Suitable for use with a low level bed, the Fall-Out Crash Mat is made from high density foam and benefits from a wipe clean PVC cover. Designed to reduce the impact if you fall out of bed, this protective mat can help to reduce the risk of injury. Machine washable.

Evacuation Sheet

The Evacuation Sheet is a transporting aid for people who require support during an emergency evacuation.

Features and Benefits

- Uses strong elastics
- Safety belts to hold the user on the mattress
- Pulling straps at each end
Heavy Duty Rollator

Rollators are an ideal solution for people who suffer from a long term disability, loss of confidence, stamina or strength. Rollators are a great way of increasing your mobility and give you support that you need while you are walking. They also provide you with the safety of a security seat for times when you are feeling tired and may need a rest. They are also a great replacement for a walking stick as a Rollator will provide support to both your arms.

Features and Benefits
- Removable basket
- Plexi table / seat
- Crutch holder
- Parking brakes
- Height adjustable handles
- Fast folding system for easy transport and storage
- Strong metal grid at the frontside

Combi Reacher
Reach and Grab with Ease

Featuring a 360° revolving head, the combi reacher is useful for picking up many household items and even benefits from additions like a shoehorn, magnet, reacher tips and rubber lined jaws for the easy retrieval of a number of items. Also ideal for storing on a walking frame.
Digital Chair Scale

The Digital Chair Scale with swivelling arm and footrests is an extremely stable model with its circular steel tube frame. A comfortable seat provides a safe position, the separately swivelling armrests make it easy to move the patient from the bed onto the chair scale and the fold-away footrests increase ease of operation.

Features and Benefits

- Locking rear wheels
- Large LCD unit behind the chair
- Mains adapter or rechargeable battery power supply
- Small children can also be weighed

Technical Data

- Capacity: 250kg
- Graduation (g): 50g < 150kg > 100g
- Power supply: Rechargeable batteries, Power adapter
- Measure (W x H x D): 563 x 906 x 946 mm
- Net weight: 24.5kg
Walking Sticks

Aluminium (Height adjustable)

Constructed from sturdy aluminium that is lightweight to carry, height adjustable and accommodates various user requirements. Hard wearing, non-slip ferrule provides stability on various surfaces. **Maximum weight capacity 127kg (20st)**

Folding (Aluminium Height adjustable)

Height adjustable from 31” – 35”, this foldable walking stick folds away neatly in 4 sections and locks automatically into position.

Grab Rails

With its textured, fluted handle, the Plastic Fluted Grab Rail is a great support to hold onto when going about your daily activities.

Get in and out of the bath safely, rise up from chairs easily and climb stairs with greater confidence thanks to this warm-touch, white polypropylene support bar that can be fixed to walls in any room or even outside.

**Available in 3 Sizes: 12”, 18” and 24”**

Urinals

Simple to use, the Male Urinal is a clear polypropylene toileting solution that’s ideal for travel and can be used at any angle without fear of spilling or leaking.

Graduated markings help with output recording and it can be machine washed.

Plastic Shoehorn

An inexpensive plastic moulded shoehorn providing an excellent reach from it’s long handle including a hanging loop attached to the handle.
ScrubEx - Automated Textile Management Systems

ScrubEx, the automated textile management system is designed to control the distribution of scrub suits or work wear within Hospitals or other environments. ScrubEx is ideally suited to hospitals, food manufacture and processing industries.

ScrubEx systems provide rapid access to garments and will allow authorised staff members to access their garments in less than 6 seconds using their existing security badges. The benefit of this rapid dispensing time is that approved staff members are able to use the systems with minimal disruption to their working day, they get what they need, when they need it and without delays due to linen deliveries.

The software that monitors the ScrubEx system will allow inventory to be monitored ‘live’ in real time. All transactions can be viewed via this management software which is communicating continuously with ScrubEx units. This ensures stock levels are at an optimal level and can be viewed by the team loading the systems so that inventory is always available. It also enables a review of items dispensed so that delivery levels can be verified. The systems and the software can ensure that non-approved staff, visitors, relatives or other departments cannot access the departments garments, which will reduce higher usage levels.

The system will also help to enforce infection control policies, as the use of the system encourages positive behaviour when it comes to collecting and returning textiles, while each fresh garment is stored independently within the Dispenser. This is a positive move away from open trolleys in changing rooms and corridors and breaks the ‘help yourself’ mentality.

Features and Benefits

- Up to 40% reduction in usage of scrub suit or work wear textiles
- Small footprint of the units maximises choice of locations allowing you to decentralise your distribution and receiving points
- Enhances infection control policies of your hospital or workplace
- Speed of access; less than 6 seconds; staff have their items and size available as they require them
- Locks out unauthorised users from other departments, visitors, and the general public
- Real time monitoring of stock levels 24/7 allows for improved forecasting capability, reports on live usage levels and accurate auditing of stock via the Linen Management Software
- Eradicate the department led requests for additional inventory and top ups
- Reduce scrub suit or work wear replacement costs up to 90%
- Quick and easy to fill

Decontamination Service

O’Flynn Medical operate a Medical Equipment Decontamination Service

The system which is used is a barrier washer decontamination system. This is a market leading system where the RED ROOM is separated from the GREEN ROOM by a glass wall which the washer passes through. Once in the clean room, the equipment is fully decontaminated and ready for testing and packing.

Items for decontamination will need to be brought to the O’Flynn Medical depot. We can collect and return your items to you and also provide you with a temporary replacement if required.

Please call to find out more about our rates and availability.

SERVICE DEPARTMENT
1. Maintenance and Repairs

O’Flynn Medical began trading almost 20 years ago as a Maintenance Company. As a result, we now have a strong and experienced engineering and maintenance team who can service and repair the majority of medical equipment you will find on the ward or in the home.

Most medical equipment can be repaired on site. Other items will need to be brought to the O’Flynn Medical workshop. When this is necessary, we will collect and return your item to you. We can even provide you with a temporary replacement if required.

2. Preventative Maintenance

All medical equipment is required to be routinely serviced in compliance with restrictions ....

The O’Flynn Medical Team are friendly, efficient, experienced and highly trained - providing a very thorough and competitive preventative maintenance service. Please call to find out more about our rates and availability.
RENTAL SERVICE
We Rent Medical Equipment
